

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## SEVENTEENTH ANNUAL REPORT OF THE TRUSTEES OF THE MASSILLON STATE HOSPITAL.

---

### *To the Governor:*

We have the honor to submit to you the seventeenth annual, or first biennial, report of the Board of Trustees of the Massillon State Hospital, together with that of the Superintendent and Steward.

#### HOSPITAL FOR THE SICK.

A new hospital building is, in our opinion, absolutely necessary to the proper care of our patients, and we renew our request for the same. There are now 1,600 patients in the institution, and out of so many it is but natural that a large number should be treated in a hospital building. At present there is not accommodation for more than one-half of those who should be placed in such a building. A suitable building for this purpose, as large as the present hospital, but much plainer, can be constructed for \$125,000.00.

#### PROPOGATING HOUSE.

We have so long felt the need of propogating houses, and, having asked for them in vain, we at last decided to construct them by the labor of the patients; and we have three fine greenhouses constructed in that manner.

#### DAIRY.

For years we have realized the importance of having clean, fresh milk from healthy cows, and have been steadily building up a herd of milch cows, until at present we have a complete dairy, with 150 cows and heifers, which will supply the institution with all the milk it will require.

#### FARM LANDS.

The state owns at present, in connection with the institution, 727 acres of land, but we find that with several hundred head of cattle, old and young, used in connection with the dairy, and the fact that all the stock used in furnishing the institution with all its fresh meat are kept on the farm, we shall need more farm land, and request an appropriation of \$25,000 for that purpose.

We particularly call your attention to the excellent results of our farming and gardening operations set forth in tabulated form in the report herewith filed, the gross amount being nearly \$40,000.

## PSYCHOPATHIC HOSPITAL.

We respectfully request that a psychopathic hospital be constructed at a cost not to exceed \$25,000. It is believed that if such a hospital be constructed, and patients sent to the institution in the earlier stage of insanity, fully two-thirds of the patients committed to the institution can be discharged cured.

It affords us great pleasure to report that there is at this time no contagious disease of any kind in the institution, and that such diseases have been readily stamped out whenever they have appeared; and that there have not been in the past year any complaints of cruelty toward any patient.

In spite of the marked advance in the cost of living we have succeeded in keeping the per capita expense of maintaining the institution at practically the same figures as that of last year.

During the year we have been called upon to mourn the loss of one of the ex-members of our board, Dr. John E. Russell, of Mt. Vernon, and it is simple justice to his memory to state that he gave the institution his best efforts, and that much of its success is due to his untiring energy and great skill in his chosen profession.

Following is a list of estimated requirements for the year ending February 15, 1911:

Current expense, 1,600 @ \$140.....	\$224,000 00
Ordinary repairs and improvements.....	20,000 00
Officers' salaries and trustees' expenses.....	11,800 00
Furniture and carpets.....	2,000 00
Additional land .....	25,000 00
Dairy barn (enlarging and repairing).....	2,000 00
Hospital for men.....	125,000 00
Grading, drives and cement walks.....	3,000 00
Books and pictures.....	500 00
Tunnel .....	2,000 00

For the year ending February 15, 1912:

Current expense, 1,600 @ \$140.....	\$224,000 00
Ordinary repairs and improvements.....	20,000 00
Officers' salaries and trustees' expenses.....	12,000 00
Furniture and carpets.....	2,000 00
Beds and bedding.....	3,000 00
Receiving cottage, or Psychopathic Hospital.....	25,000 00
Grading, drives and cement walk.....	2,500 00
Pathological supplies .....	1,500 00
Books and pictures.....	500 00

Respectfully submitted,

GEORGE D. COPELAND, *President*,  
 JEROME B. ZERBE, *Vice-President*,  
 JOHN S. ELLEN,  
 HARVEY J. ECKLEY,  
 GEORGE L. FORDYCE,

November 15, 1909.

*Trustees.*

*To the Board of Trustees, Massillon State Hospital:*

GENTLEMEN:—I respectfully submit the seventeenth annual report (first biennial) of this hospital.

As this is the first biennial report required, it will be necessary to duplicate a portion of the report of last year and combine it with this year's work.

On November 15, 1907, there were remaining in the hospital 1,510 patients, of whom 779 were men and 731 were women. There were admitted during the biennial period 853, of whom 501 were men and 352 were women. Of this number 403 were admitted during the first year of the biennial period, and 450 were admitted during the second year. The whole number under treatment therefore was, for the first year, 1,913, and for the second year, 1,972.

There were discharged during the biennial period 762, of whom 446 were men, and 318 were women. Of this number, 333 recovered, 133 were discharged improved, 36 unimproved, and 259 died. Of those recovered, 206 were men and 127 were women. Of those improved, 76 were men and 57 were women. Of those unimproved, 22 were men and 14 were women. Of those who died, 139 were men and 120 were women.

The percentage of recoveries on number admitted was 41+ for men, and 36+ for women; for both, 39. The percentage of deaths on total number under treatment was 6.60.

The causes of death were as follows:

Organic Brain Disease.....	18	Apoplexy .....	16
Organic Disease of Heart.....	26	Pneumonia .....	30
Arterio-sclerosis .....	4	Paresis .....	34
Pernicious Anemia .....	2	Carcinoma .....	3
Killed by train.....	1	Asphyxia .....	2
Enterocolitis .....	2	Pyemia .....	3
Pyelonephritis .....	3	Gangrene .....	2
Septicemia .....	8	Pleurisy .....	1
Tuberculosis .....	18	Peritonitis .....	4
Epilepsy .....	3	Appendicitis .....	1
Senile Dementia .....	39	Uremia .....	5
Exhaustion .....	27	Shock .....	1
Erysipelas .....	6		

The ages of those admitted were as follows:

Between 15 and 20 years.....	24
Between 20 and 25 years.....	60
Between 25 and 30 years.....	87
Between 30 and 35 years.....	92
Between 35 and 40 years.....	97
Between 40 and 45 years.....	125
Between 45 and 50 years.....	96
Between 50 and 60 years.....	123
Between 60 and 70 years.....	79
Between 70 and 80 years.....	56
Over 80.....	16
Unknown .....	4

The reported duration of insanity was as follows:

Under 1 month.....	200
Between 1 and 3 months.....	117
Between 3 and 6 months.....	150
Between 6 and 9 months.....	66
Between 9 and 12 months.....	19
Between 1 and 2 years.....	73
Between 2 and 3 years.....	64
Between 3 and 5 years.....	52
Between 5 and 7 years.....	21
Between 7 and 11 years.....	11
Between 11 and 15 years.....	4
Over 15 years.....	10
Unknown .....	116

Of those admitted during the biennial period there were native-born, 653; foreign-born, 154; unknown, 46. Of those remaining there were probably curable, 103; possibly curable, 195; chronic, and probably incurable, 1,301.

The recovery rate, based upon admissions, was 39. Based upon acute cases received from their homes, was 68. There were under treatment during the period 13 cases admitted under the Voluntary Commitment Act. Of those, 6 were discharged recovered, 5 were discharged improved, 2 unimproved. Two were recommitted by the probate court.

The great disparity between percentage of cases recovered of those received directly from their homes and the general admissions, impels me to again urge the necessity of early attention to mental alienation. Friends of the patients are too prone to postpone action, and thus allow the insidious disease to make fatal encroachments before curative measures are instituted. Insanity is not the dreadful, incurable affliction so generally believed; but if the individual be promptly placed in the care of conscientious and capable alienists, I believe a large percentage will make prompt recoveries. The state hospitals are used as places of last resort and after all other means have failed, and consequently, our splendidly equipped, curative institutions become merely custodial, and the patient a victim of chronic mindlessness.

I do not believe that a central psychopathic hospital would be of special service in overcoming this unfortunate condition, as the state of Ohio is so large geographically that it might work a hardship upon those living near the extreme boundaries to take their friends to a central institution, and the result would be delay. It would certainly be more expedient to build a small psychopathic hospital on the grounds of each of the existing hospitals, where patients could be taken very early, even before positive insanity has developed. I am satisfied a *very large* percentage of such cases would recover promptly if given early and proper treatment. It is the accumulated and accumulating mass of insane cases which makes the burden so heavy upon the taxpayer. Early treatment

would materially reduce the number drifting into chronicity. The progress of the times demands a more liberal and a more scientific attitude toward this class of unfortunate men and women, who, oftentimes, through no fault of their own, are bereft of reason.

These psychopathic hospitals could also be equipped for the care and treatment of inebriates, and thus the necessity for a separate institution for this purpose be at least postponed. It is frequently very difficult to discern the distinguishing marks between inebriety and insanity, hence the care of these cases in a building connected with the various state hospitals would seem to be the rational procedure. Many alcoholics are really insane, and therefore, should be cared for in an institution for the insane, and not, as has been suggested, in an institution intended for persons other than insane.

There are many reasons existing for the small psychopathic hospital connected with each state hospital in preference to the building of a separate central psychopathic hospital and an institution for the inebriates.

#### DEATH RATE.

Our death rate has been low, considering the class of cases admitted, more than 50 per cent. of the deaths occurring in senile cases.

#### METHODS OF TREATMENT.

Our armamentarium has not been materially altered since last report. We still depend almost entirely upon the different forms of hydrotherapy for the quieting of excited patients. No new drugs have been added to the list, and, in fact, fewer drugs are used than formerly. What is ordinarily denominated "dope" has been almost entirely eliminated from our pharmacy. Chemical restraint has gone the way of mechanical restraint.

#### PATHOLOGICAL DEPARTMENT.

Our chief pathologist, Dr. O'Brien, continues his original research work with unabated enthusiasm. His line of study as to the etiology of paresis has the sanction and co-operation of such men as Dr. Ford Robertson and Dr. Clouston, of Edinburgh, Dr. Fleishman, of Australia, and Prof. Bianchi, of Naples. I verily believe that this heretofore incurable malady will have to yield eventually to the strides of progressive science.

#### EMPLOYMENT AND DIVERSION.

Someone has said that the kindest thing one may do for a friend is to give him employment, and this certainly applies to those afflicted with mental maladies. Without diversified means of employment the state

hospital is seriously handicapped, and the unfortunate inmate destined to a life of monotony and idleness. Employment is necessary for the sane, and the only rational treatment for the insane is to deal with them as though they were sane. Our large farm, garden and dairy give opportunity for much of the needed diversified employment. In addition, I believe each institution should have ample room for workshops of all kinds. This policy would not only inure to the very great benefit of the patient, but would be an economical measure as well.

#### IMPROVEMENTS AND REQUIREMENTS.

We have constructed about 7,500 square yards of no-dust roadway. The entire driveway from entrance gates to office building has been reconstructed with stone and gravel, bound together with carbo-via and rolled thoroughly with a 16-ton roller. From present appearance the road will be all that could be desired. All this work was done with patients' labor.

We have installed an entirely new heating and hot water system, which gives us an ample supply at all times. Painting and decorating cottages, building of walks and driveways have continued throughout the year.

#### DAIRY.

We have now about 120 cows in our herd, and will soon be able to supply all the household with milk and cream from our own dairy. The food inspector gave our dairy barn and storage room for milk a very high rating upon his inspection in the early summer, and the State Veterinarian found but three cows out of our entire herd which reacted to the tuberculin test. These cows were killed at once, so that we now have assurance that our herd is perfectly healthy.

#### REQUIREMENTS.

In addition to the usual requirements for the running expenses of the hospital, it is imperative that a new hospital building for men be provided for. The present hospital was built for women, but we have been compelled to keep both men and women in the one building since the opening of the hospital, ten years ago. We are much overcrowded in the men's department, and have no facilities for proper classification. The recent cases must be cared for in this building, and frequently persons are removed to cottages long before their condition warrants it, because of the influx of new cases and the want of room in the hospital building.

At least twenty per cent. of the patients of any hospital for the insane need special supervision and treatment, but with one hospital build-

ing, with a capacity of only one hundred and fifty for an institution with sixteen hundred patients, you can see that we are able to give this special care to only about nine per cent. It is not desirable to have both sexes in the same building, especially in the recent cases. To enable us to properly care for the recent cases, giving them the curative measures to which they are entitled, requires a hospital building for men accommodating one hundred and fifty. To construct a fire-proof building with this capacity would require \$125,000.

A receiving cottage, or psychopathic hospital, is essential for the best management. First impressions are sometimes of vast moment, and frequently the recovery of a patient depends upon the impressions received upon admission. We believe that a properly constructed and equipped receiving cottage would materially hasten recovery, and consequently, looking upon the matter from a purely mercenary standpoint, such a cottage would be an economy. For this purpose \$25,000 would be required.

#### EXPENSES.

The per capita cost per annum, based upon total disbursements, except ordinary repairs and permanent improvements, was \$145.13.

Based upon net current expense and officers' salaries, as formerly figured, was \$127.09.

Comparative cost since opening of the hospital, including current expense and officers' salaries:

1899.....	\$214 29	1900.....	\$168 29
1901.....	141 81	1902.....	144 39
1903.....	149 83	1904.....	139 49
1905.....	114 84	1906.....	117 69
1907.....	118 83	1908.....	125 33
1909.....	127 09		

#### AMUSEMENTS.

We think we are well repaid for giving our patients all the amusements possible. They must have diversion, and while employment occupies a large place in their lives, yet they require something else. During the summer months we have had baseball, croquet, tennis and other outdoor sports. The winter season brings with it our weekly dances, at-homes, concerts, basket ball, bowling and theatrical entertainments.

We are indebted to the Welsh Glee Club for an afternoon of pleasure, Rev. Harry Maxwell for an hour of evangelistic songs, Mr. G. L. Fordyce for an evening with birds, Mr. H. C. Muckley for a stereopticon lecture on Yellow Stone Park and the Grand Canon; to the children of the Presbyterian Church for an Easter cantata; to the Knights of Columbus for an evening of comedy; to the Independent Newsboys' Band for

a splendid concert, and we are under special obligations to Mr. Joseph Zimmerman for the splendid vaudeville entertainments which he furnishes us gratuitously twice weekly. Our patients have come to look forward to these particular entertainments with more pleasure than anything with which we have heretofore been able to furnish them. The Hospital Dramatic Club has also given us several evenings of splendid entertainment. The total number of entertainments, including at-homes, chapel services, concerts and dances, was 145 for the year.

#### OFFICIAL STAFF.

There have been no changes in our official household.

Drs. Brown, O'Brien and Adair, ably assisted by Drs. Tatje, Als-paugh and Chetwynd, have continued their work with zeal and enthusiasm. They have one and all been careful, capable and painstaking, and I take this means of testifying to their worth.

Mr. Dudley, the steward, and Mr. Gibson, the storekeeper, have at all times been courteous and careful in the discharge of their duties.

I wish to take this opportunity to assure the supervisors, and all the other employes, that we are not unmindful that they have, with few exceptions, performed their onerous and frequently thankless duties with efficiency and faithfulness, and on behalf of their many charges, I gratefully acknowledge their loyal service.

And to you, gentlemen of the Board, I desire to express my grateful appreciation of your unvarying kindness and courtesy, and of your encouragement and timely counsel under many trying conditions.

Respectfully submitted,

HENRY C. EYMAN,  
*Superintendent.*

November 15, 1909.

---

#### PATHOLOGICAL DEPARTMENT.

DR. HENRY C. EYMAN, *Superintendent:*

I take pleasure in submitting a brief report from the Pathological Department for the year ending November 15, 1909.

During the year, 32 autopsies were held, from which some interesting findings have been recorded. Special attention has been devoted to the examination of the cerebro-spinal fluid of different mental disorders. Lumbar puncture has been done quite systematically upon the various mental disorders for diagnostic purposes, and on several occasions for therapeutic reasons.

A special study of the fluids of 150 cases has been recorded and is now ready for publication. We believe the examination of such fluid is of immense value as a diagnostic agent.

We have also ready for publication the report of the urine examinations of about 500 cases, also several hundred blood examinations. A careful survey of such a report affords us a ready means of understanding some of the underlying physical conditions of cases admitted to the service.

We continue to devote special attention to investigations into the causation of "paresis." At the present writing the evidence adduced leads us to believe an early solution of the etiology of this unfavorable malady is at hand.

Respectfully submitted,

JOHN D. O'BRIEN,  
*Pathologist.*

## FINANCIAL OFFICER'S REPORT.

II. C. EYMAN, *Superintendent*:

DEAR SIR:—Herewith find the biennial report of the Financial Officer of the Massillon State Hospital for two years ending November 15, 1909.

Yours respectfully,

BARRY DUDLEY,  
*Financial Officer.*
